

SHYMART

Date: 31/07/2023

Guide: Ms. Meera Rose Mathew

1. Project Overview?

ShyMart is a user-friendly online platform that transforms the experience of grocery shopping is provided on the supermarket website's abstract page. This digital supermarket offers clients a simple and practical method to buy for daily necessities by fusing cutting-edge technology, a sizable product selection, and personalized features. The website for the online supermarket is a comprehensive solution created to offer clients a smooth shopping experience, allowing them to browse, search, sell and buy products. A user-friendly interface and simple navigation are provided, ensuring easy access to a large selection of goods across numerous categories. A website for the online supermarket improves the shopping experience by providing these features, enabling users to effortlessly explore a wide range of product catalogues, make safe payments, and take advantage of quick order fulfilment. It improves the admin's control over product and customer management, order processing, and business growth.

2. To what extend the system is proposed for?

Customers can use the system to buy groceries online in the comfort of their own home based on their preferences. Instead of spending all day exploring a physical store, they may save time. They have the chance to assess the rewards from various sellers. A website that sells only high-quality goods makes it more trustworthy for clients and offers reliable delivery management.

3. Specify the Viewers/Public which is to be involved in the System?

Potential clients seeking to acquire supermarket items with individualised recommendations and secure online payments.
